Cannabis Nutrition Network taking wellness to the next level

Take a closer look...

DEMYSTIFYING CANNABIS FOR HEALTH PROFESSIONALS

Everything you wanted to know about nutrition and cannabis but were afraid to ask!

About the Speakers

Laura Lagano, MS, RDN, CDN and Donna Shields, MS, RDN helped blaze the path for RDNs in business & communications some 30 years ago. Now they are pioneering a new path in the emerging cannabis industry with a nutritionally based line of edibles, an online nutrition education platform for medical marijuana patients, and training programs for healthcare professionals.

Learning Objectives

- To understand the endocannabinoid receptor system and the therapeutic differences among major cannabinoids
- To review the primary applications of cannabis in health conditions (seizures, anxiety, cachexia, Crohn's disease, cancer)
- To identify consumption methods for cannabis and evaluate the varying functionality among food ingredients as cannabis carriers
- To interpret edible product labeling and make appropriate recommendations
