How to apply: <https://recruiting.adp.com/srccar/public/nghome.guid?c=1210901&d=Pharmavite-External&prc=RMPOD4>

We currently are seeking a dynamic, strategic, and innovative **Principal Scientist**. This key position will be based in our facility located in Valencia, CA (So. CA).

For more than 45 years, Pharmavite has been a trusted leader in the wellness industry, recognized for providing quality vitamins, minerals and supplements under our Nature Made® brand name.

Who We Are: *Our mission is People creating new products for better health worldwide.*

What We Do: *Our vision is inspiring the healthiest you through more complete nutrition... Wherever you are in life.*

As a member of the Pharmavite team, employees enjoy competitive salaries and an exceptional benefits package which includes medical, dental, vision, 401K, life insurance, and long term disability coverage. In addition, employees enjoy our employee incentive plan (EIP), educational assistance, credit union membership, substantial discounts on our products, 11 paid holidays per year, and an opportunity to be part of a health/wellness organization.

Position Summary:

Effectively manages all aspects of the formulation, product/process development, scale up and commercialization of dietary supplement dosage forms. Explores and conducts research in relevant technologies. Focuses on providing enabling technology advancements in dietary supplement dosage forms and functional foods to drive innovation and point of differentiation.

Responsibilities:

- Explores, identifies and develops innovative and proprietary technologies that have strategic significance.
- Collaborates with outside entities to develop and drive advancements in technology.
- Conducts well-designed experiments. Presents relevant findings to the appropriate technical groups and management. Develops prototypes to demonstrate application of new technologies.
- Develops intellectual properties relating to composition, usage and manufacturing process that will result in viable patents and/or competitive advantages.
- Maintains a network of vendors, consultants and educators to leverage emerging and enabling technologies.

- Develops complex formulations and processes to support the development of new and novel products and/or optimization of existing products, meeting deliverables in a timely manner with excellent results. Responsible for performing and/or managing bench top, pilot, manufacturing scale-up and verification batches.
- Provides strong technical leadership to Marketing, Operations and other cross-functional disciplines to accomplish project goals.
- Trains others in developing new products; conducts appropriate experiments and instructs in the proper use of laboratory and manufacturing equipment.
- Performs other related duties as assigned.
