

VITALITY WORKS

Quality Control Manager

Job Summary

Vitality Works is a fast growing dietary supplement manufacturer located in Albuquerque, NM, now in our 36th year. We manufacture natural herbal, vitamin and nutraceutical products of uncompromising quality. We are seeking a ***take-charge, resourceful, process-driven, and methodical*** QC leader to manage the QC staff to ensure the best possible product in accordance with FDA and cGMP, customer and company specifications and requirements. You will also further develop QC workflow, processes and procedures including managing QC staff on raw material testing, product testing, batch record review and ensuring product quality, in addition to ensuring, continual development of our in house micro and analytical lab; including but not limited to FTIR, HP-TLC, UV-VIS as well as expanding and procuring our testing lab capabilities including HPLC and ICP-MS and other analytical test equipment.

This position will report to the President of the Company but will work closely with the COO who is responsible for production.

Knowledge, Skills, and Abilities:

- Prior experience in herbal supplements, Pharma or foods manufacturing a plus
- Strong people and process management skills, excellent multitasking with follow through, and a positive attitude required.
- Working knowledge and understanding of current Good Manufacturing Practices for the Dietary Supplement industry under 21CFR111.
- Analytical skills pertaining to manufacturing and laboratory activities.
- Experience with HPLC, FTIR, UV-VIS, ICP-MS and other analytical testing expertise preferred.
- Ability to handle a fast paced production environment.
- Ability to review and update SOP's for the department.
- Desire to network in the natural products industry, join working committees and attend workshops and educational events.

Education: Minimum Bachelors of Science in Chemistry or related field

Experience:

- Minimum 3 years in a GMP manufacturing environment preferred

- Minimum 3 years in QC management position preferred
- Experience in nutraceutical industry preferred
- Strong knowledge of 21 CFR 111 and auditing laboratory processes preferred.
